

Ultra Light - Ultra Strong - Ultra Safe Industrial Aluminium Loading Ramps

Rapid Ramps are made in New Zealand from a special aluminium extrusion to give maximum strength. The aluminium sections used in our ramps are specially designed to provide the best traction without compromising the strength to weight ratio.

Free Phone: 0508 31 31 31 **Email:** sales@transquip.co.nz **Web:** www.transquip.co.nz
Christchurch: 2 Edmonton Rd, Hornby 8042 **Auckland:** Unit 29, 761 Great South Rd, Penrose 1061

Transquip's Alloy Loading Ramps make loading easy. With them on board you'll be:

- **Versatile** – load fast, anytime, almost anywhere.
- **Safety** – no dangerous loading methods or back breaking lifting with our lightweight alloy.
- **Economical** – save time, save space and save towing costs.
- **Reassured** – with our professionally engineered, proven design.
- **Spoilt for choice** – with many models available from our three ranges:
 1. The ATV, Motorbike and Ride-On Lawnmower Range.
 2. The Light Industrial Range (for 750kg to 2500kg loads).
 3. The Heavy Industrial Range (for 3000 to 7500kg loads).
- **Covered** – with our 14 day no risk guarantee: If you're not completely satisfied with any purchase, return it in its original condition and packaging within 14 days for a full refund. (Excludes custom made items and freight costs).

Five quick steps to choose your ramp: (or fill out the order form on the back page)

1. Consider the operating mass of the machine, including the attachments.
2. Work out the tyre or track width.
3. Measure the truck's deck height.
4. Choose your connection method – normally a flat plate (which is secured with pins supplied with the ramp).
5. Call, email or check out our website – we'll have the right ramp in stock or we'll make it and deliver it... fast!

Heavy Industrial Ramps Range

3000 – 7500kg

Our heavy industrial ramps are tough but comparatively light and easy to use. They come in a range of sizes, or we can custom-make to your requirements.

Standard Sizes

Remember, variations to suit your needs are easily accommodated. Larger capacity ramps available on request.

Standard Sizes	Model	Capacity ¹	Weight per Ramp	Length ² Metres	Section Dimensions (mm)			
					A	B	C	D
 <p>CROSS SECTION</p>	2031	3000kg	32kg	3.3	400	490	125	40
	2033	4500kg	45kg	3.3	450	550	150	45
	2034	4500kg	47kg	3.6	450	550	150	45
	2034B	4500kg	50kg	3.6	450	550	150	45
	2036	6000kg	58kg	3.6	530	650	175	60
	2036B	6000kg	61kg	3.6	530	650	175	60
	2037	7500kg	68kg	3.6	600	730	200	60

Notes:

1. Capacity based on axle load per pair of ramps. Wheelbase and load distribution affect rating.
2. Length includes connecting plate.
3. The 4500kg and 6000kg models are available in two different rung sections. Those with the traditional type have a 'B' after the model number.

Light Industrial Ramps Range

750 – 2500kg

- Light and easy to store.
- Supplied with pins for secure attachment.
- Wide ribbed rung for excellent traction and strength.
- Load quickly, safely and easily with these loading ramps, which are ideal for smaller machinery. Super strong with solid traction these are available in a range of sizes, and remember we custom-make ramps as well.

750 - 1200kg

	Model	Length	Capacity per pair	Mass per ramp (kg)
	2045	1.5m	1200kg	7kg
	2046	1.8m	1100kg	9kg
	2047	2.1m	950kg	10kg
	2048	2.4m	850kg	11kg
	2049	2.7m	750kg	13kg

900 - 1700kg

	Model	Length	Capacity per pair	Mass per ramp (kg)
	2010	1.8m	1700kg	11kg
	2011	2.1m	1400kg	13kg
	2012	2.4m	1200kg	15kg
	2013	2.7m	1000kg	16kg
	2014	3.0m	900kg	18kg

1500 - 2500kg

	Model	Length	Capacity per pair	Mass per ramp (kg)
	2020	2.1m	2500kg	15kg
	2021	2.4m	2200kg	17kg
	2022	2.7m	1900kg	19kg
	2023	3.0m	1700kg	21kg
	2024	3.3m	1500kg	23kg

	Part Number	Description	Size
	2030	Pin for securing flat plate to deck.	14mm diameter

GET UP AND GO!

ATV, Motorbike, and Ride-On Mower Ramps

- Easy to handle, lightweight aluminium.
- Wide ribbed rungs for excellent traction and strength.
- Simple to attach to vehicle - either hook to tailgate or sit plate on deck.
- Folding options available. Indicated by 'F' after model number.
- Punched plate surface also available upon request.
- Some models fold for easy storage.
- Super strong and reliable design.
- Extra light...only 7kg per ramp!

Model	Length	Overall width(mm)	Capacity kg each pair	Type of Ramp
2001	2.1m	295	500	ATV with rungs
2001F (folding)	2.1m	295	500	
2002	2.1m	275	400	Ride-on with rungs
2002F (folding)	2.1m	275	400	

	Part Number	Description	Size
	2000	Pin for securing flat plate to deck	10mm diameter

Ultra Light - Ultra Strong - Ultra Safe

**Excellent strength to weight ratio.
Rapid Ramps are made with special aluminium
extrusions to keep them light but strong.**

Designed and made in New Zealand.

**Our experts are available nationwide. Call
0508 31 31 31 or email sales@transquip.co.nz
and one of our friendly staff will help you,
or visit www.transquip.co.nz to purchase
online now. Stock available in Christchurch and
Auckland for immediate dispatch or pick up.**

**Spoilt for choice.
Standard range available or get custom
made to suit your requirements.**

ALUMINUM LOADING RAMP ORDER FORM

To get the correct Ramps for your application, simply copy this form, fill it out and email to sales@transquip.co.nz.

1. Type of Machine _____
2. Total Machine weight, including attachments: _____ Kg
3. Truck Deck _____ Height: _____ mm
 Type: (tick one) Flat deck Bath tub Beaver tail
4. Total Length of Ramp: _____ mm
5. Any Special Ramp section measurements:

A: _____ mm, B: _____ mm, C: _____ mm, D: _____ mm.

6. Rungs
 Type: (tick one) Angle Standard extrusion
7. Machine Traction
 Type: (tick one) Wheels Rubber tracks Steel tracks
8. Connection Method (tick one) Flat plate and locating pin Hook

Draw any special requirements in this box showing measurements etc:

Fill in your contact details below and email to sales@transquip.co.nz.
